

Os superpoderes dos bichos (Juiz de Fora: Ah! Editora, 2024)

[The Superpowers of Animals]

Luciana Inhan (text) & Thales Estefani (illustration)

In this book, the author describes the particular characteristics of several animals, identifying them as true superheroes of nature! Then, I illustrated those animals in all their diversity of colors, shapes and sizes! The book was written in the midst of the 2024 Olympic Games, when we were watching the expression of the superpowers of humans on television. For more information, see [Ah! Editora website](#).

ISBN printed book: 9786598312923 | ISBN ebook: 9786598312947 | Dimensions: 21 X 14.8 cm | In color, 36 pages.

The book can be purchased through [Um Livro store](#) (printed physical book) or [Amazon](#) (printed physical book or e-book).

"Os superpoderes dos bichos" was very well received and was even included in teaching practices. In the city of Paraíba do Sul, in the countryside of the state of Rio de Janeiro, teacher Liliane used the book in one of her classes to develop students' reading skills!

After reading, the students also identified their own superpowers. They were able to perceive their abilities and recognize their importance! Isabel said she really liked the blue whale, because it also loves to sing and sings very well! Sophia agreed with her! Vitinho said that his superpower is being able to make a big mess for fun and then clean it up very quickly! João also seems to like speed, as he chose the peregrine falcon as his favorite animal in the book!
